Thessaloniki, 06/6/2016

Dear Professor Giannis,

On behalf of my respiratory colleagues I am writing to thank you personally as well as with Professor Ken Jebsen, for the donation of a new spirometer for the measurement of a lung function in children with chronic pulmonary disease. As you know we are running a big department with chronic pulmonary diseases and cystic fibrosis in children and the value of the spirometer type VINTUS SPIRO TP SPIROMETER and total cost of 4.428,00 euros will be great.

With this a new equipment we will be able to calculate automatically the Z score of the measurements which give us more accurate estimates of the lung disease.

We hope to be able to demonstrate to you the new spirometer during your next visit to Thessaloniki.

Many thanks for your kindness.

Kind regards,

John Tsanakas, MD, PhD, MRCPCH  
Professor in Respiratory Paediatric Medicine  
Aristotle University of Thessaloniki  
Head of the Department
